

LEAD LINED PANELS

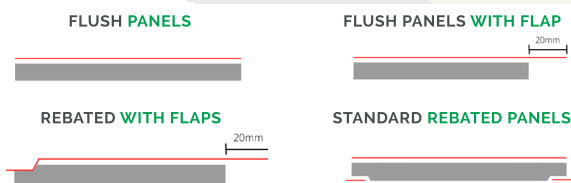

Guardian's Lead Lined Panels are a prefabricated panel for use in applications where protection from radiation is required.

Comprising of a single, non pierced sheet of lead, bonded to a substrate, panels are delivered to site fully laminated to a specified thickness and ready for installation.

Lead Lined Panels are available in standard sheet sizes in addition to fully customisable options such as sheet size, lead thickness and choice of substrate.

Commonly specified and utilised in hospitals, dental surgeries, medical and health clinics, veterinary clinic rooms.

KEY FEATURES

- Effective protection against X-ray radiation
- Cut to size for easy installation
- Customise size, thickness and substrate

IDEAL APPLICATIONS

- Hospitals & Medical Centres
- Dental Clinics
- Any area exposed to X-Ray
