

PERFORATED PANELS

Guardian's perforated and slotted product capabilities enable a range of customised solutions for any fibre cement, compressed fibre cement, plastics and ply products in standard and non-standard sizes.

Celebrating form and function, these designer panels improve architectural aesthetics, whilst providing the practical benefit of sound absorption in external or high traffic environments.

Delivered to site as a completely finished internal/external product, Guardian's perforated panels save on site resources and minimise environmental and health and safety concerns.

OPTIONAL FEATURES

-  Sound reduction and dampening
-  Water resistant through painting
-  Suitable for harsh environments
-  Unaffected by sun UV, moisture or vermin
-  Extremely durable and hard wearing

IDEAL APPLICATIONS

-  Facade and Fascia Systems
-  Wall and ceiling tiles
-  Hotels, Restaurants, Clubs & most commercial projects.
-  Eaves Linings
