

# READIPANEL

## FACADE SYSTEM

Guardian's Readipanel Facade Panels are a premium pre-finished fibre cement panel used for building facades and fascias. Readipanel is delivered to site cut, drilled, indexed and painted to specification for a quick and easy installation. Available in a broad range of paint systems and colours for complete design flexibility.

Readipanel is an innovative, non-combustible alternative for facades, fascias and re-cladding projects. Highly suitable in commercial and residential projects, Readipanel is popular as a design feature using colour combinations, printed images, patterns and timber look finishes.

The system can be installed using James Hardie guidelines and product or your own engineered solution.

### KEY FEATURES

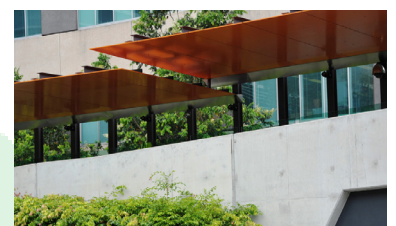

- Non-Combustible
- Graffiti resistant
- Scratch and abrasion resistant
- Resistance to mould, mildew and rot
- Easily cleaned during cyclical maintenance
